The Future in Motion

Matt Touch. Wood Look. Woodec.

Design Meets Function

Matt Touch.
Wood Look.
Woodec.

Matt Touch.

skai® woodec designs are characterized by a unique matt finish and deep embossing. The perfect combination gives window profiles a particularly high-quality and realistic look. Feel it for yourself!

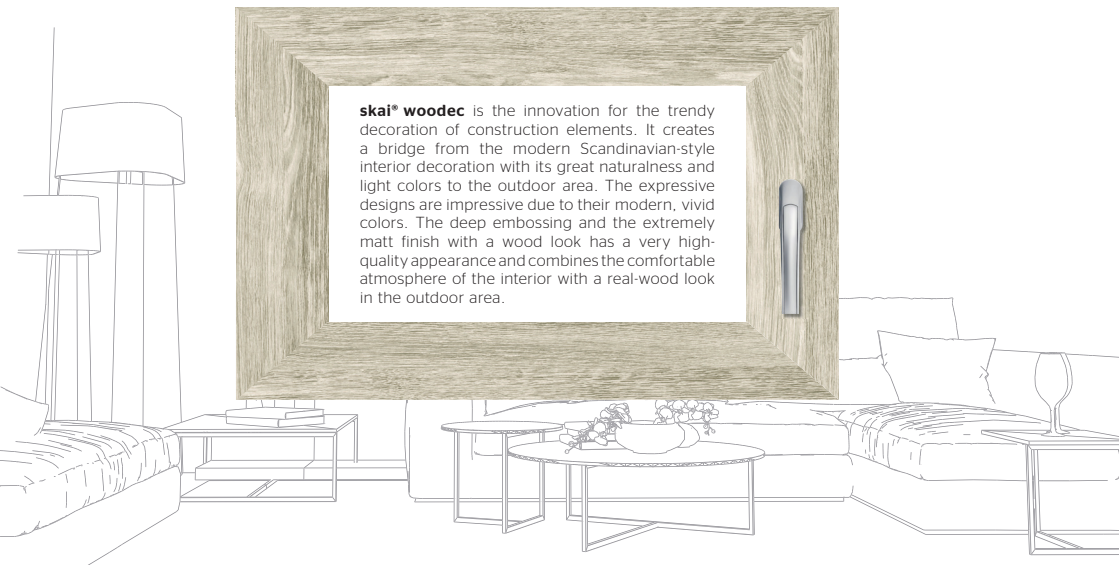

Wood Look.

With expressive and modern designs, **skai® woodec** ensures a perfect genuine wood look. Almost indistinguishable from a wooden window, it enhances the appearance of the building shell. See it for yourself!

Woodec.

The innovative **skai® woodec** surface brings the trend of natural living to the window. The astoundingly realistic wood look combines the outside with the inside and brings look and feel into perfect harmony. Experience it for yourself!

skai® woodec is the innovation for the trendy decoration of construction elements. It creates a bridge from the modern Scandinavian-style interior decoration with its great naturalness and light colors to the outdoor area. The expressive designs are impressive due to their modern, vivid colors. The deep embossing and the extremely matt finish with a wood look has a very high-quality appearance and combines the comfortable atmosphere of the interior with a real-wood look in the outdoor area.

ContiTech. Smart Solutions Beyond Rubber

ContiTech is a division of the Continental group and is one of the world's leading industrial specialists. As a technology partner, our name is synonymous with development and material competence with regard to components made of rubber and plastic as well as in combination with other materials like metals, fabrics, or silicone. Furthermore, we create new, trendsetting products using electronic components.

In addition to products, systems, and services, we offer holistic solutions and play a decisive role in the design of industrial infrastructure. We consider digitalization and current trends to be an opportunity to create additional value together with our customers - mutually and sustainably.
